A lot of Brush Modes include fill palettes set to different, dimensionless colors to draw out paths, strokes and outlines. As part of an ongoing quest to make it easier to learn something about the program, there's even support for the Adobe Watercolor Pen, which lets you paint and draw on your image, like you would in a normal drawing app. In the process, you can create complex levels of detail across your entire image, and it's fast enough to make your regular output time go down to seconds.
